About Me

Systems Engineer with experience building Full-Stack and Mobile applications, focused on building scalable and reliable solutions. Proactive professional committed to continuous learning and applying engineering best practices to deliver high-quality code. Motivated to contribute to impactful projects with a collaborative mindset and a strong focus on maintainable software.

Technical Skills

Languages	TypeScript, JavaScript, Python, Dart, Solidity, C++, C#, SQL.
Frontend	React, Next.js, Redux, HTML5, CSS.
Backend	Node.js, NestJS, Express, Prisma ORM, .NET.
Mobile	Flutter (BLoC, Cubit).
Databases	PostgreSQL, MySQL, Firestore, Supabase, NeonDB.
Testing & QA	Cypress, Jest, Playwright.
Tools	Git, GitHub, Postman, Trello, Figma, Agile (Scrum).
Other	Foundry, NPM, PNPM, Docker.

Professional Experience

Full-Stack & Multiplatform Developer

Jan 2025 – Nov 2025

Interactive Display System Platform

React, Firebase, Supabase, Flutter

- Developed an interactive information display system with real-time synchronization using Firebase, enabling instant content updates across devices.
- Built a Flutter-based mobile interface using BLoC architecture to ensure scalable and maintainable state management.

- Designed and implemented role-based access control (RBAC) for administrators and operators.
- Implemented secure data validation and structured database schemas to maintain data integrity.

Freelance Full-Stack Developer

Dec 2024 – Jan 2025

Tu Café • Restaurant Management System

React, Redux, Firestore, Flutter, NestJS, Prisma

- Designed and developed a full-stack restaurant management system supporting in-person and online orders.
- Built RESTful backend services using NestJS and Prisma to handle order processing, menu management, and transaction tracking.
- Developed cross-platform mobile features using Flutter to streamline order management for staff.
- Optimized order workflows, reducing manual steps and improving operational efficiency.

Freelance Full-Stack Developer

Jan 2025 – Feb 2025

Importadora Santiago • Inventory Management System

React, NeonDB, Supabase, Express, Node.js

- Developed a web-based inventory management platform for a medical equipment supplier.
- Implemented inventory tracking and CRUD operations using React and Node.js.
- Designed role-based access control (RBAC) to manage permissions for administrators and staff.
- Reduced stock inconsistencies and manual tracking errors through centralized inventory management.

Mobile Developer Intership

Jul 2024 – Oct 2024

Coboce Cemento • Quotes Application

Kotlin, PostgreSQL, NeonDB

- Developed a mobile sales application in Kotlin to generate product quotes and manage client orders.
- Integrated PostgreSQL database services to store product and transaction data.

- Streamlined the sales workflow by reducing manual processes for field sales representatives.

Freelance Desktop Developer

Jul 2024 – Oct 2024

Camionexpert • Accounting System

Java, MySQL, NetBeans

- Developed a desktop accounting and inventory management system using Java and MySQL.
- Implemented modules for stock control, sales management, quotations, and financial reporting.
- Designed role-based user authentication to manage administrative and operational access.
- Reduced stock inconsistencies and manual accounting errors through automated reporting and data validation.

Academic Projects

Quality & Metrics Platform

2024

React, NeonDB, SonarQube, Python

- Served as a Scrum Master & Lead Quality Engineer.
- Developed a custom analytics suite that integrated with SonarQube to monitor and visualize critical code health indicators, including cyclomatic and cognitive complexity.
- Established a data-driven approach to software quality, ensuring adherence to clean code standards and reducing technical debt during the development lifecycle.

Full-Stack Travel Agency Platform

2024

React, Redux, Firebase, Express, Node.js

- Engineered a comprehensive full-stack application featuring complex booking flows, hotel management systems, and dynamic itinerary planning.
- Implemented a robust global state architecture using Redux, ensuring data consistency and high performance across multiple user interaction points.
- Designed a responsive and interactive interface focused on providing a seamless user journey through complex data-driven forms.

Android Mobile Application

2023

Flutter, Firebase, Google API's

- Designed and built a cross-platform mobile application utilizing Flutter, focusing on real-time user engagement through Push Notifications.
- Integrated various Google Cloud APIs for extended functionality and managed the full lifecycle of the project, including successful deployment to the Google Play Store for academic evaluation.

Education

Systems Engineering

Universidad Católica Boliviana San Pablo

Cochabamba – Bolivia

2020 - 2025

Colegio La Salle

Graduated in Humanities

Cochabamba – Bolivia

2008 - 2019

La Salle College High School

Student exchange program to strengthen academic and English language skills

Philadelphia – United States

February 2019 – May 2019

Certifications & Training

- English Certificate (C1 Advanced) – EF SET
- C++ & JavaScript Course – Sololearn
- Ethereum Developer Pack – *Ethereum Bolivia*
- Solidity Smart Contract Developer – Cyfrin Updraft
- Full Stack Developer – Full Stack Open

Languages

Spanish (Native) • English (C1 Advanced) • Chinese (Basic)
