About Me

I'm a systems engineering student passionate about full-stack and multiplatform development, continuous learning, and exploring emerging technologies. Motivated to begin my professional career in software development, contributing as a reliable, proactive, and collaborative eager to grow and deliver high-quality results.

Technical Skills

Programming Languages: JavaScript, TypeScript, HTML, CSS, Dart, Kotlin, Solidity, C++, Python.

Libraries: React, Node.js.

Frameworks: Flutter (Bloc & Cubit), Next.js, Nest.js, Express, Foundry.

Databases: PostgreSQL, MySQL, MongoDB, Firestore, Supabase, NeonDB.

Version Control: Git, GitHub.

Project Management & Tools: Trello, Figma, NPM, Agile (Scrum), Postman.

Development Tools: Visual Studio Code, Visual Studio, Android Studio.

Languages: Spanish (Native), English (C2), Italian (Basic).

Education

Systems Engineering Universidad Católica Boliviana San Pablo	Cochabamba – Bolivia 2025
Colegio La Salle Graduated in Humanities	Cochabamba – Bolivia 2019
La Salle College High School Student exchange program to strengthen academic skills and raise the level of the English language	Philadelphia – United States 2019

Professional Experience

Coboce Cemento Internship (2024) — *Kotlin, PostgreSQL, NeonDB*

Developed a mobile application to facilitate products sales and quotations, improving efficiency in the sales process.

Freelance Work (2025) — *React, Redux, Firestore, Flutter, Nest.js*

Full-Stack development for the restaurant Tu Café, creating solutions for both in person and online orders. Implemented scalable and efficient systems to support a high volume of daily customers, enhancing user experience and operational efficiency.

Freelance Work (2025) — *React, NeonDB, Supabase, Express, Node.js*

Full-Stack development for Importadora Santiago, a medical equipment supplier. Built an inventory control system to optimize stock management, improve product tracking and reduce input recording errors.

University Projects

Totem Interactive Display (2025) — *React, Firebase, Supabase, Flutter*

Developed an interactive display system to showcase relevant information. Implemented real-time synchronization and state management using Bloc for scalable and maintainable UI behavior.

Android Application Development (2024) — *Flutter, Firebase, Google API's*

Planned, designed mockups and developed a Flutter application using google API's and push notifications and application was launched on Play Store.

Web Page Development (2024) — *React, NeonDB, SonarQube, Python*

Served as Scrum Master for the Quality Team, implementing metrics such as cyclomatic and cognitive complexity using SonarQube to ensure optimal code quality. Developed new features for multiple user roles.

Web Page Development (2024) — *React, Redux, Firebase, Express, Node.js*

Developed a full-stack web application simulating a travel agency focused on Bolivian touristic destinations. Implemented features including flight booking, hotel reservations, and itinerary planning. Designed the UI/UX for a responsive and interactive user experience, and managed state using Redux to ensure smooth navigation and data consistency.

Testing and Automation (2024) — *Python, TestLink, Pytest, SonarQube, Cucumber.*

Planned and organized Scrum tasks to test a web application. Learned and applied various testing methods including white-box, black-box, and automated testing.

Web Page Development (2023) — *React, JavaScript, Cypress, TDD*

Planned, organized Scrum workflow, and developed a web page using React and JavaScript. Implemented test cases using TDD methodologies with Cypress and Jest.

Certifications & Training

- **English Certificate (C2 Proficient)** – EF SET
- **C++ Course** – *Sololearn*
- **JavaScript Course** – Sololearn
- **Ethereum Developer Pack** – *Ethereum Bolivia*
- **Solidity Smart Contract Developer** – Cyfrin Updraft
- **Full Stack Course** – Full Stack Open
